Please note that all DDTC Scent Work classes begin in week 2 of each session and require a supply fee of \$10 be added to the class registration cost when registering for classes. Scent Work is an activity that allows reactive dogs to participate so dogs in our Scent Work classes will be left in their vehicle or crated when not actively working. Please plan accordingly.

LEVEL 1 SCENT WORK

- In this first class your dog will learn foundation scent work skills to eagerly and independently hunt or search for something he or she wants and will learn a basic, default search pattern.

- **A crate or leaving the dog in the vehicle is required for this class. All dogs must be in a crate unless actively working or the handler will leave their dog in their vehicle bringing the dog to the search area when it is their turn.**
- After building your dog's desire to hunt, we will introduce the first target odor, "sweet birch" oil. Your dog will learn the association between target odor and a highly desired reward.
- Gradually and systematically, your dog will be introduced to searching for the target odor source to earn that fabulous reward.
- You will learn how to help build your dog's drive for scent work and how to support and reward your dog's independent searching and problem-solving.
- Students must have a nonrestrictive harness for their dog by Week 3.
- Students will be expected to purchase a training kit to be used for practice outside of class that will be explained in the first couple weeks of class. Cost is \$20.
- **OFFERED IN THE WINTER SESSION ON MONDAYS AT 6 PM, IN THE EARLY SPRING SESSION ON TUESDAYS AT 6PM, AND IN THE LATE SPRING SESSION ON WEDNESDAYS AT 6 PM. FUTURE SESSIONS TO BE ANNOUNCED**

LEVEL 2 SCENT WORK

- Completion of Level 1 Scent Work is required
- In this class you and your dog will be introduced to four of the search elements that you will encounter in a trial: interior searches, exterior searches, vehicle searches, and container searches.
- **A crate or leaving the dog in the vehicle is required for this class. All dogs must be in a crate unless actively working or the handler will leave their dog in their vehicle bringing the dog to the search area when it is their turn.**
- Your dog will continue to build drive for target odor and searching and will be encouraged to work target odor all the way to source under a variety of circumstances.
- Handlers will begin developing the leash handling skills needed for actual searches and will start learning how to observe the dogs for subtle changes in behavior that may indicate the presence of target odor.
- Students will be expected to purchase a training kit to be used for practice outside of class that will be explained in the first couple weeks of class. Cost is \$17.
- **OFFERED IN THE WINTER SESSION ON TUESDAYS AT 10 AM, IN THE EARLY SPRING SESSION ON MONDAYS AT 6 PM, AND IN THE LATE SPRING SESSION ON TUESDAYS AT 2 PM. FUTURE SESSIONS TO BE ANNOUNCED**

- Building the dog's desire to get to and stay at the target odor source will be emphasized.

- Handlers will learn how to encourage their dogs to commit to the target odor source without creating conflict.
- Dog and handler teams will also start working on more challenging target odor hide placements, including less accessible hides, lower hides, and more elevated hides, similar to what you might encounter at a trial.
